**Subject:** Dicamba + Glyphosate Tank Mixes

**Importance:** High

Rick,

Hope all is well. I am hoping you can help resolve a lingering issue on the above topic. As you may recall, we submitted a vegetative vigor study to support tank mixing dicamba and glyphosate for use with dicamba-tolerant soybean and cotton. We understand that EPA's review of that study, which is overdue, is the final step in the Agency's process for evaluating glyphosate and dicamba tank mixes. The growing season is now underway in the south and growers are without this important weed resistance management tool. We remain willing to discuss directly if the Agency has any questions concerns. Please feel free to contact me at any time at 314-308-6836.

Thanks,

Tom
